Dear Owner/Occupier

### Re: Planning to Redevelop 10 Anzac Highway Forestville

Renewal SA is leading the urban renewal of Adelaide on behalf of the Government of South Australia by creating inspiring places where people want to live, work, invest and spend time.

On behalf of the SA Government, the Forestville site (formerly home of le Cornu) will be developed by Renewal SA in partnership with a private sector developer as a high-quality, master planned mixed-use development. The planning and design of the site will aim to meet the needs of the South Australian community now and into the future.

The site, at 10 Anzac Highway, with which you will be familiar as a near-neighbour, also fronts Leader Street and Maple Avenue. At approximately 3.6 hectares, it is one of the last remaining large-scale vacant city fringe sites providing one of the most significant mixed-use redevelopment opportunities for the inner suburbs of Adelaide.

**Government of  
South Australia**

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

## Project Vision

The vision for the Forestville site is the creation of an innovative, sustainable and connected residential and mixed-use development, comprising:

- medium to high density dwellings
- retail/commercial opportunities
- affordable housing
- high quality integrated public open space(s)
- connectivity with adjacent commercial and residential areas

Government's vision highlights the importance of urban renewal and the significant impact it has on the community socially, economically and environmentally.

## Seeking a Developer

As the first step for redeveloping the site, Renewal SA is releasing an Expression of Interest (EOI), to select an experienced developer from the private sector to develop the masterplan and design for redeveloping the site. The EOI will run from 30 March 2021 - 25 May 2021, with the successful developer being announced later this year (2021). A summary of the EOI can be read at the following website link <https://renewalsa.sa.gov.au/projects/forestville/>

## Engagement

Renewal SA is committed to ensuring that key stakeholders, including the community, are engaged as part of the planning process.

The developer will partner with Renewal SA to engage with key stakeholders and the broader community on the draft master plan. Details on when and how that will occur will be provided once the developer is appointed.

During the EOI process (i.e. while seeking and selecting a developer over the next few months) Renewal SA will start engaging key stakeholders, including the neighbouring community. We are keen to learn about and understand the community's connection to and interest in the area and to address any concerns regarding the Forestville development, while introducing the Renewal SA team.

## Register Your Interest

If you would like to be kept informed on the progress of the planning for the redevelopment of the Forestville site, please register your interest at <https://renewalsa.sa.gov.au/projects/forestville/> or email [RenewalSA.Engagement@sa.gov.au](mailto:RenewalSA.Engagement@sa.gov.au)

Regards,

**Katy Ellens**

Development Manager

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

## Appendix 2

### Community Engagement Invitation

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

## INVITATION HAVE YOUR SAY

Renewal SA invites you to share your thoughts on the redevelopment of 10 Anzac Highway Forestville.

We are keen to understand the community's connection to and interest in the area and hear concerns regarding the redevelopment of the Forestville site.

The former Le Cornu furniture warehouse site is one of the last remaining large, vacant city fringe sites, providing one of the most significant mixed-use redevelopment opportunities for the inner suburbs of Adelaide.

The vision for the Forestville site is the creation of an innovative, sustainable and connected residential and mixed-use development, comprising medium to high density dwellings, retail/commercial opportunities, affordable housing, high quality integrated public open space(s) and connectivity with adjacent commercial and residential areas.

Renewal SA is committed to ensuring that key stakeholders, including the community, are engaged as part of the planning process.

View the map, make comments or ask questions between now and August 23 by visiting:

[renewalsa.mysocialpinpoint.com/forestville](https://renewalsa.mysocialpinpoint.com/forestville)

Your feedback will help the development of the draft master plan for the next stage of engagement.

Should you require further information, including alternative ways to provide feedback, interpreter assistance, or to be kept informed on the progress of the planning for the redevelopment of the Forestville site please visit [renewalsa.sa.gov.au/projects/forestville](https://renewalsa.sa.gov.au/projects/forestville)

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

## Appendix 4

### How to use Social Pinpoint

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

## How to Use Social Pinpoint

Renewal SA encourages you to provide your thoughts and ask questions. Social Pinpoint allows you to provide your comments or ask questions about specific zones on the Forestville interactive map via easy-to-use visual markers. Simply drag and drop the comment and/or question marker directly onto the map. Your contributions will appear on the site map.

Social Pinpoint is accessible on mobile devices, however for the best experience we recommend a desktop or laptop computer

### **Read and Explore:**

Start by reading the tabs on the left sidebar menu for an overview of the engagement process and to learn about the Forestville development.

Click on the identified areas within the interactive map or use the links within the legend (right side of the page), to learn more about the Forestville development. Click on an area either on the site map or via the legend, this will display a window with information about the area.

There are four areas identified on the site map they are as follows:

- Site boundary
- Mixed-use area
- Residential area
- Feedback boundary

### **Comment about a specific area:**

Marker Pins

### **Using a Desktop Computer**

- Drag the appropriate marker pin from the top bar and drop it in the exact area your comment and/or question refers to or within the feedback boundary area.

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

## Using a Smart Device - Mobile Phone

- Tap 'Add', drag the map to place a marker pin where your comment/question refers to Tap 'Place marker here'

## Enter your comments/questions and details

- Enter your comments and/or questions, there is no limit to the number of comments and/or questions you leave
- Enter your details
- Your contributions will appear in the 'Feedback to Date' sidebar tab and on the map, these will be visible for others to read
- Your privacy is important to us and your identity will **not** be displayed publicly
- You can like or dislike other's comments by using the link at the bottom of each comment
- Read and agree to the terms, then click 'Add Comment' to submit your feedback

## Tips

- Tick the 'Remember' box to avoid re-entering your details
- You may add a photo to provide more detail to support your comment (Please note: photos or links are reviewed before appearing with your comment or question)

## Add to the Conversation

- Find out what others are saying by going to the 'Feedback to Date' tab or selecting an existing marker on the map
- You can also like/dislike comments or add your own thoughts
- Please keep your contributions courteous, respectful and on topic
- Use the funnel icon on the top right to filter by topics or keyword

## For More information

If you wish to provide feedback using an alternate format, please email Renewal SA's engagement team for alternative ways to provide feedback.  
Email: [RenewalSA.Engagement@sa.gov.au](mailto:RenewalSA.Engagement@sa.gov.au)

<https://renewalsa.mysocialpinpoint.com/Forestville>

### Social Pinpoint comments

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

## Comments

- 1 Please think of cyclists and have a proper separated cycle way. Already it's dangerous to use the bike lanes on Leader at as car traffic just park across them. Bike stations to pump tyres would be welcome City of Unley
- 2 I agree a small IGA would be excellent. But I would love to see greengrocers, bakery, smaller shops and cafes as well rather than a big supermarket.
- 3 I agree. There is so much high density housing and not enough infrastructure to support all the current residents. City of Unley
- 4 longer right turn green arrow for increased leader street traffic Dept. of Infrastructure & Transport
- 5 It would be nice if the 10 Anzac Highway, Forestville vacant block could be a big park for residents in the area who live in apartments to take their children to and also being across road from the Hospital it would lovely for patients and visitors as well.
- 6 Please make this a development with architectural impressiveness, not just a clump of boring hebel monstrosities which is currently occurring with urban infill in the inner Adelaide suburbs.
- 7 It's a big space. I hope that whatever it is used for has adequate parking and green space.
- 8 I would be keen to see this the boundary of the mixed use and Residential to not be a hard boundary but more like Habitat lifestyle precinct and workspace at Byron Bay. Is that possible?
- 9 Would it be possible to have more of the higher density (taller) buildings at the Anzac Hwy facing part of the site? High-rise doesn't really fit in with the surrounding streets and community.
- 10 Please include Ashford Hospital users when deciding car parking capacity. These users are currently causing significant congestion through parking in Forestville side streets. City of Unley, City of West Torrens & Ashford Hospital
- 11 As Leader St is already a busy connector can all traffic into the residential development come of Maple Street? City of Unley
- 12 As a local resident I would like to see a top quality Japanese restaurant and Sushi Train in this area, an independent shoe repair service and an Aldi supermarket, amidst plenty of well-shaded walking space.
- 13 Anzac Highway access to the mixed use section of the development is the obvious and most practical way of handling motor vehicle traffic, particularly if underground car parking facilities below the commercial and retail offerings is made available. High rise residential development at the rear of the site will enable a quieter living environment with good access to a range of public transport for residents. Dept. of Infrastructure & Transport
- 14 Connection with this development to Ashford Hospital by way of provision for Hospital car parking is seen as an opportunity to lessen traffic congestion in the Ashford side of Anzac Highway where it is already very difficult for residents and hospital visitors to find a car park. City of West Torrens & Ashford Hospital
- 15 Even better, keep it all at medium density.

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 16 Absolutely agree, the value of houses in the area has increased exponentially in last 12mths enough to compete with Unley, so why would you put structures in that would DE -value the area as a whole, as said below we already have many amenities that work for this area you don't need to double up, agree you need more parking bays but you need them before you hit the suburbs, not on top of them, you need more green spaces for children to grow, even a mini sports field for mixed use not big/flash
- 17 Not a thorough fare into Leah or any other side street off of LEADER, re direct back onto MAIN Arterial roads where they should be, otherwise what's the point of spending Billions of taxpayer money making super highways into/out of the city if you are going to have masses of people parking in residential streets & utilizing these streets as rat runs, defeats the purpose & wastes money, Build a parking structure on land opposite the Flinders H where there is no residents behind the police station.  
City of Unley and Dept. of Infrastructure & Transport
- 18 Are you going to ignore as per usual local voices?!! If u were forward thinking you would build a transport hub accommodating the new train, bus's with lots of high rise Parking bays behind the Sturt police near the Flinders intersection without impacting on residents up & down the stream of the super Highway and affecting all residents along the way into & through the city
- 19 Why not do this high rise mixed use when you open up the Army Barack's which we all know you will do once, you've sold off Forestville, why don't you put the Lego Blocks. service stations, shops there, that way traffic can flow easily without impacting on local residents now an any future holding of valued land and homes that already exists and have Forestville as a green area complimenting it
- 20 Great idea to develop a space for people to gather like plant 4. Love this idea
- 21 Would love to have a small and large dog park for exercising. No large supermarkets or petrol stations but lovely eateries and bars would be welcomed.
- 22 Yes, I agree with higher level residential toward Anzac highway and open green space, plant 4 type environment deeper into the suburb.
- 23 Please remember that Ashford hospital leased many parking spaces from the old site and now that it is shut the narrow streets are overwhelmingly being blocked by these workers trying to find alternatives. Someone needs to build an underground and above ground car park. Please also keep in mind other developments in the area that are also dense currently being constructed. Thank you  
City of Unley and City of West Torrens
- 24 Suggest to have a multifunctional shopping centre like Westfield Marion etc including shopping, leisure, Cafe, restaurant and commercial office above. Ideally it could be a ICONIC building in this area instead of medium or high density residential townhouses. Many houses have been built or building at the back of adjacent to KFC. Do you think it looks good for the city sightseeing prospect?
- 25 Connection between mixed used and residential needs to be carefully considered i.e. open space, greening, warehouse / market / event space such as Plant 4.
- 26 I find the landscaping already down Anzac Hwy Lego Blocks trying to be a surfers paradise set up disgusting, it's not in keep with the surrounding areas of low height housing and family homes with gardens, parks, walking & cycling trails, as it is now we already have increased traffic and on street parking in residential streets this I see increasing by building up, we don't need anymore service stores we are in the golden triangle with amenities what we need is more green space  
City of Unley and City of West Torrens

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 27 I would love to see a village square/Plaza design of sheltered open green space with playground surrounded by alfresco dining, cafes, bars, shops and businesses and accommodation above. Plaza Nueva in Bilbao (where I used to live) is a fantastic example of dense vibrant design that is a pleasure to be in.  
The Anzac Highway end should be solid so as to reduce noise pollution.  
Any parking should be below ground. Please do not build a huge open air carpark on this precious land.
- 28 The multi-storey apartments allowed on a small side street opposite the Le Cornu site is already causing traffic bottlenecks and parking crises for local residents. More apartments to come near the intersection of leader street will make this exit - and Maple Tce on the other side - even more difficult for those businesses and our residential side City of Unley
- 29 Would love to have public open space in the middle of the area e.g. a depression has become a temporary lake which is attracting birds, could become permanent and contribute to the Brownhill Creek flood management plan. On either side of the lake, playgrounds, native corridors, well designed/passive solar townhouses, cycling tracks. Anzac highway side - mixed use shops, cafes, social housing, underground carpark with access from Anzac highway only. Also the bread factory could be acquired?
- 30 1. Please include some three and four bedroom homes. This is a great area for families and so many new developments are majority 1 and 2 bedroom designs. A family with 3 kids need a 4 bedroom home  
2. Working from home is likely to remain a trend. Having some housing stock with a shopfront or home office attached would be excellent, and add to the mixed use of the area. This would also keep life in the area night and day.
- 31 As this project is supposed to be eco-friendly. I would like to see:  
- recycled materials such as stone, redbrick and wood featured to complement the textures of surrounding area.  
- Please, please no black or dark grey walls! Good passive solar design principles.  
- native plant corridors. This area was once the Kerta Weeta (Black forest).  
- maybe a community allotment available to apartment dwellers.  
- more imaginative design look at co-ops and christies walk in the cbd.
- 32 I would like to see a focus on pedestrian friendly design taking inspiration from human scaled architecture around the world. The shopping streets of Japan, shophouses of Singapore, town squares, Plazas and Piazzas, are so pleasant to be in - why not create something beautiful rather than generic shops? All of these spaces are mixed use, medium to high density areas, that are pedestrian friendly. A combination of car free open space, shops, cafes, bars and playground would be fantastic.
- 33 I agree there are already enough supermarkets nearby. The only supermarket I would be happy to have included is a Foodland similar to Pasadena Foodland. I definitely would increase the open space too. It would make the suburb more peaceful and classy. Include as many trees and plants as possible.
- 34 There are already a lot of supermarkets nearby. Coles on Anzac Highway, a large Drakes on Goodwood, IGA on Goodwood, all a short walk away. Why would you even be considering another supermarket on this precious stretch of land compared with meaningful community space, whether outdoors or indoors. Increasing open space from 12.5% would be a huge win.
- 35 Just wondering what the expected impact will be on surrounding streets as far as increased traffic? How will this be managed? City of Unley

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 36 Brick and Mortar in Norwood was one of my favourite cafes before it closed. Could you include a similar cafe? It sold local artists artwork and crafts. It also hosted art workshops (watercolour, print making etc). It had a great relaxing atmosphere and good quality food.
- 37 Any traffic should be directed onto Anzac, Not Leader where it would go back into the already highly congested traffic flow. Enter and exit via Maple only.... Listen to those already living here we are already struggling with increased traffic and will have more from various residential and developmental projects eg...Sth Rd...Third Ave ...aged care... City of Unley
- 38 We live right near here, but often ride across the city to spend time at Plant 4 Bowden, we love the cafes, the grass area and the mix of entertainment opportunities for people of all ages, including the play equipment, I would love to see something similar here.  
Due to the location, would need on-site parking that could also be used by visitors of the hospital.  
Could a pedestrian overpass be included over Anzac Highway!?  
Dept. of Infrastructure & Transport and Ashford Hospital
- 39 I think a small supermarket would be great as without a car it's not easy to access the other supermarkets. I find Goodwood Rd challenging to cross on a bike at peak hour and the supermarket would service Ashford as well as Forestville. Parks and outdoor spaces are more important though. Dept. of Infrastructure & Transport
- 40 We would love Flexicar pods here. This would encourage use of the car share network to shoppers and residents who don't have cars. It would also encourage new residents not to buy cars and use other forms of transport (public transport, cycle for commuting) which are close, as well as Flexicar for occasional car trips. Flexicar is perfect for this mixed use site as it promotes living without a car and will ease traffic congestion.
- 41 Where is the open space going to be? I would like to see large open space similar to the park lands or a playground like marshmallow park on Glen Osmond Rd.
- 42 As a local mostly car-free resident I disagree. This is a spot that has limited walkable access to supermarkets, but is surrounded by suburbs where you can. I live just across ANZAC Hwy and walking to Kurralta Park shops is slightly too far to be comfortable and convenient. If a supermarket is not built as part of this development, it would force all new residents to drive to the shops, increasing congestion, car dependency, and the danger to pedestrians and cyclists.
- 43 A big shopping centre would ruin the area. There are already many shops/commercial buildings along Anzac highway. An open green space is what is missing from the area. Rundle Mall is nearby as well as shops on King William Road and Unley Road.
- 44 Plan for all storm water to be retained and used within this area
- 45 A new bicycle crossing connecting to Reid Ave Ashford to Leader Street and the new development would greatly increase safety and rideability in the area.  
City of Unley, City of West Torrens and Dept. of Infrastructure & Transport
- 46 Use lots of tall trees, shrubs & groundcovers to create shade for dwellings, roads and open spaces. Preferably lots of vegetation which would have been in this area prior to colonisation
- 47 A lot of the new buildings/houses around Adelaide are ugly with very little space between the buildings and small gardens (like Lightsview). Please build good quality attractive houses with gardens. And have trees on the streets. Not too many townhouses next to each other and no big

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

multi story units. Affordable housing is good, but they should also be houses that people want to live in/enjoy living in.

- 48 Can a new pedestrian railway crossing be put in to allow easier access to Showgrounds railway station. Currently the large and impassable military complex makes it very difficult to walk there.  
Dept. of Infrastructure & Transport
- 49 I am an Ashford resident and never have a problem with parking or congestion. The street space in front of my house is often used by hospital visitors but there is ample parking, particularly for residents who can store their cars on their own property.  
City of West Torrens
- 50 I agree. The problem with many Adelaide medium density developments (Bowden for example) is that they build only for single people. I live in a 3-bed townhouse in Ashford and all of my neighbours are families with children. More medium density houses and apartments for families is so important in changing how Australians live to be more sustainable.
- 51 Love this! Carbon neutral would be best with EV charging stations, water tanks, diverting all food waste from landfill and being solar-powered!
- 52 Can we please make sure we don't have high density accommodation.  
We also need to have ample parking to keep cars off the street
- 53 What with all the other sites being developed for accommodation and other things in the area and along the Hwy and with how people were forced to live during covid lockdowns...and associated pollution from increased traffic, this area is a much needed opportunity to create a green space. There is very little in the be builds.  
We need trees, play space And exercise areas to escape the rack and stack mentality. Show leadership in developing liveable Adelaide and park land city.
- 54 We need to make sure we have green spaces for multi aged groups
- 55 Please plan walking & bike trails which are separate from roads & incorporate these into existing bike and walking trails  
City of Unley and Dept. of Infrastructure & Transport
- 56 Good to have a mix of permanent shade structures especially with increase in extreme weather at all times of year! Means less cancellation of events and safer spaces for community gathering.
- 57 Incorporation of water sensitive urban design onsite, that also includes biofiltration, plants to soften edges and boundaries between spaces.
- 58 Paint some dope murals
- 59 I agree. I use flexicar when I need a car the occasional time when it is truly needed. Having Flexicars available would massively decrease the overall number of cars in the area.
- 60 Locals should have a say on the vision stated. There are plenty of locals that would like this land to be repurposed for essential social infrastructure. Creating a high density development will only make issues worse. Ie where will the students go who move in with multiple nearby public high schools already at capacity???
- 61 Design the arrangements to allow for a small licensed venue(s) that can successfully run at normal bar hours- the full gamut of businesses that build a community need to be able to operate to build a vibrant community. This is usually overlooked and is impossible to authorise later once residential is finished - let's get the planning right up front!  
Dept. for Education

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 62 Great idea!
- 63 During peak times, traffic around this area is already busy, consideration on which way traffic will be directed towards Anzac Highway and Goodwood Road will be an important factor, otherwise, I like the idea of a mix of residential housing styles and housing sizes.  
*City of Unley and Dept. of Infrastructure & Transport*
- 64 Actually, if we want new developments like this to generate less traffic, we should allow LESS than the usual amount of parking. A parking-lite, high-density development would be ideal for a location as accessible as this one. On-street parking issues are best prevented by on-street parking management. This might mean (for example) a parking permit system on residential streets nearby and time limits or parking meters on the busy part of Leader St.  
*City of Unley*
- 65 Parking in the area is already at a premium in the surrounding area. With high density housing where most owners/tenants have more than one car, is more parking going to be available? Remember, Forestville is used as a Park and Ride for Train and Tram users.  
*City of Unley and Dept. of Infrastructure & Transport*
- 66 Yes. Great use of space compared with a supermarket.
- 67 Yes, a flat one, not one where pedestrians pay the price and you have to go up and over and back down again. So time consuming and inconvenient.
- 68 Yes! It would be great if this development was pro-families, providing decent sized accommodation at not crazy prices and a children's play area would be a big asset.
- 69 Somebody on another comment suggested houses with a shop front. It's so easy to see an artist having such a house and having a simple cafe/gallery space.
- 70 Yes! Environmentally in tune space is vital. But wide streets just takes us back to where Adelaide already is - addicted to cars. This is a chance for a community to develop which changes that. Great facilities for bicycles in the area and excellent public transport. So why not make it a community with a small number of shared electric vehicles, and then you don't need to design it so that it has heavy car traffic in what is, after all, a very small area.  
*City of Unley and Dept. of Infrastructure & Transport*
- 71 Yes to shop fronts - instead of having a large supermarket as part of the proposal, facility for small shop fronts is a great idea.
- 72 Really hate the idea of turning this area, any bit of it, into a car park. Any parking should be underground, and for locals, not a solution to other areas' failures.
- 73 A cool local bar or brewery would be brilliant.
- 74 Parks, Ponds, Gardens, BBQs, more trees, swings.
- 75 Park, Dog run area, Australian trees, wetlands, native animal sanctuary
- 76 Can we please not have high density accommodation. high rise apartments will de value the area and just create traffic issues. They will also look horrible. Leader street is already too busy with traffic, Maple street should be used for entry/exit. A Playpark for kids would be lovely.  
*City of Unley*
- 77 Nightingale homes in Melbourne provide a good example of sustainable, affordable, higher density development that people want to live in. I encourage everyone to check it out!  
<https://nightingalehousing.org/completed-projects> some great possibilities

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 78 the development states there will be a mix of high and medium density housing. I think the quality of the dwellings, eco-friendly design and proper infrastructure is more important. I DO agree that really high rise should not be a part of this development. I would like to see a cap on height of buildings - say 4 or 5 stories maximum - in Bowden they have quite tall blocks and I don't think that is a good fit for the area.
- 79 Innovative multi use development... similar concept to Plant 4 but aligned to the surrounding community. Goodwood is a unique suburb full of a sense of community; good produce; multi-culturalism; the arts. Adelaide will be seeking created shared office space for people no longer working the CBD but wanting a space separate from their home. Make the most also of the amount of traffic trolling south from the cbd needing to pick up food/ groceries. accommodation to be pitched at young couples.
- 80 1% of total budget towards public art!!
- 81 Why do you assume most residents would own more than one car? High density housing near a rail line is perfect for people to love a car free life
- 82 Community garden and/ or allotments - green waste composting on site - community hall/space for classes, meetings, parties, playgroups etc
- 83 Would love to see a sports recreational centre like St Clair here, since we don't seem to have any local public sports spaces besides parklands
- 84 It is critical that this development has public open green space as Unley Council area is so short of it. Gardens for some of the houses with trees and vegetation are also essential. We are losing much of our green space to wall-to-wall apartment blocks. May we remember that this was once Kaurna land known as Kertaweeta, the Black Forest. City of Unley
- 85 Any argument about traffic congestion can equally apply to Forestville. In spite of existing parking restrictions in Second Avenue and surrounds, hospital staff regularly park in the area, as do other commuters. So parking & traffic issues are already a major concern all round. City of Unley and Ashford Hospital
- 86 The local schools are already at capacity. What this site should be developed into is additional schooling. Given Richmond PS, Blackforest PS and Warriapendi School are all possibly going to be lost in South Road upgrades. There is a lot of medium density housing going up locally already, attracting young families and overloading the current schools. Dept. for Education
- 87 Medium to high density housing here?? Are you kidding. The one and only feeder road (Leader St) is already horribly congested during peak times, without another 40-100 cars trying to get out into traffic. City of Unley and Dept. of Infrastructure & Transport
- 88 More or less every green area in Adelaide is for dogs now, including the Parklands which are nearby. I'd love to see a beautiful garden area, instead of just another empty green space used for dog exercise and dog lavatory visits. Something peaceful where you could feel like you were communing with nature. Amazing if that could be created.
- 89 No high density housing please because in a short space of time it becomes a ghetto block like the one on the other side of the train line. Why do we need a bunch of consultants/builders getting rich from designing 500 dog houses that have no character and look the same? Just cut up the land and sell off the blocks to the people. If you need to build 15% as 'affordable' to satisfy your socialist policy then do that but send the rest to the free market and it'll be done in half the time and \$

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 90 So excited for this area to become the new Bowden!  
With good planning and consideration I think concerns about traffic can be managed. High density apartment living is the way of the future, and this site is perfect for it.
- 91 The main focus of this development should NOT be provision of hospital carparking. That is the responsibility of the hospital. Hopefully this development allows more people to live car free or use cars less. Ashford Hospital
- 92 Please consider putting in a decent amount of green area. It would be great to see some low density 3-4 bedroom houses with a garden. Looking at the current property market there is currently a shortage of these houses and young families are being forced into the outer suburbs. Small cafes/restaurants would be great to add to a community vibe.
- 93 I agree, small shops, IGA, as long as it's not Coles/Woolworths/Aldi!
- 94 Sustainable, passive energy design that incorporate green space would be idea. Medium density housing with dwellings that support a range of demographics (elderly, housing suited to those with disability, affordable, small and family sized units) would be great. If all the units are built as 2br or unaffordable 3br the desired diversity will stagnate. Location is perfect to upgrade access to public transport corridors and connect to bike lanes.  
Greenspace. Trees. Water retention. Community. City of Unley and Dept. of Infrastructure & Transport
- 95 I don't think we need another dog park, would love the public spaces to be dog friendly though.
- 96 Great idea. I've heard of their developments as well and am very impressed.
- 97 I tend to agree with this. Some parking for residents is necessary, but if parking isn't provided and streets are well managed then the development would encourage less cars. I don't see why this would be any different to the decisions faced by those who move into apartments with single parks (or no car parks) in the city. For what its worth, this location is as close to inner suburbs as you can get and had great public transport options as well :)
- 98 Not sure how the logistics would work, but I definitely love the idea of increased connectivity for bike users. If there are major developments in the area it makes sense to undertake upgrades these types of infrastructure at the same time. The ability to cross Anzac Highway on a bike would be fantastic as there is no current safe way to join up to the fantastic bike path networks that pass through Forestville. One of the best ways to reduce local car traffic is to increase bike connectivity.  
City of Unley, City of West Torrens and Dept. of Infrastructure & Transport
- 99 Wide paths along Leader Street for east-west connectivity City of Unley
- 100 Wide paths along Maple Avenue for east-west connectivity City of Unley
- 101 Upgrade bus stop with amenities and real time information [Stop 3 Anzac Highway]  
Dept. of Infrastructure & Transport
- 102 Retain the trees along Anzac Highway City of Unley and Dept. of Infrastructure & Transport
- 103 I disagree with this comment. I live across the highway from the site, and it feels like every week another house is being demolished to put up 4 townhouses. This site is perfect for high to medium density apartment blocks similar to those in Bowden. Of which, there aren't any in the area!
- 104 Is it possible for a supermarket and cafe facilities to be included in the development to facilitate the aging population living in the area who are unable to drive

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 105 Allow pedestrian connectivity within the army barracks to the Adelaide Showground Station. This would extend an 800 metre walking catchment to the station by 150 metres.  
Commonwealth Dept. of Defence and Dept. of Infrastructure & Transport
- 106 Continuous foot path with zebra crossing and narrowed road entry design (Maple Ave)  
City of Unley and Dept. of Infrastructure & Transport
- 107 Please allow high quality 10-12 storey buildings here and allow small bar liquor licensing within this area.
- 108 Improve pedestrian connectivity here (Anzac Highway in front of Ashford Hospital)  
Dept. of Infrastructure & Transport
- 109 Pedestrian crossing on northeastern side of signals or potential all green phase for pedestrians (Reid Ave/Anzac Highway)  
City of West Torrens and Dept. of Infrastructure & Transport
- 110 This intersection is poorly designed for pedestrians and should be considered as part of the wider development of the overall area (Marleston / Alexander Ave)  
City of West Torrens and Dept. of Infrastructure & Transport
- 111 Plant 4 appears to have worked well in Bowden and a similar community minded approach would likely work here as an alternative to the fast foods on offer. Underground parking on/off the NW corner from Anzac highway.  
I don't believe that a commercial sized supermarket (i.e. bigger than an IGA) would work in a 'plant 4' type development, as no one really wants to hang out at the local big chain as it ruins the atmosphere. However, something to service the new residents seems appropriate.
- 112 A supermarket and cafe facilities would be welcome in this area for the older residents who are unable to drive.
- 113 I drive along leader street now and the traffic at peak times can bank up can be right back across the train line to turn left onto Goodwood Road. Leader Street and the train line will need to be upgraded/expanded if that residential area goes ahead. In addition how many streets into and out of this area will be added to leader street. Are there plans for any upgrades to the roads?  
City of Unley and Dept. of Infrastructure & Transport
- 114 I live in Ashford and all around us houses are being knocked down and 3-6 townhouses are being built. 10 houses gone 60 townhouses built. No additional infrastructure. More residential here is not a sound plan. Anzac highway and leader street are already crawling in peak hour. How many residential properties are anticipated in this area? Not needed here with all the apartments in the city. This should all be parks and bbq areas, dog parks playgrounds etc. all for community use for locals  
City of Unley
- 115 I live in Ashford and 10 houses demolished and 60 townhouses have gone up. No additional infrastructure. And this is still increasing. With all the apartments in town there is No need for additional high density residential here. Should be kept for parklands; playgrounds; dog parks for the many locals.  
City of Unley and City of West Torrens
- 116 Overpass for pedestrians and cyclists to safely pass over the multiple train tracks on Leader St or an overpass for trains, cyclists/pedestrians similar to the one over the multiple new roads near FMC or the South Rd tram stop. Improves flow for cars but more importantly safer for pedestrians and cyclists. Considering this is right in the middle of the cycle pathway to the city it is a dangerous and annoying intersection for pedestrians and cyclists.  
City of Unley and Dept. of Infrastructure & Transport

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 117 I don't believe that this area needs more high density apartments. All of Anzac Highway is filled with apartments. This space should be used for open parks, safe cycling paths for children and adults, tennis courts, basketball courts and all kinds of outdoor activities to encourage people to leave their apartments! I'm thinking a mini version of Hyde Park in London with a lake, cafes, and walking cycling paths. Or what about a City Beach that is a safe place for kids to swim like in Brisbane?
- 118 What about Goodwood oval? and the Unley Pool? Open green space and playgrounds would be great here, maybe a tennis court and basketball court but, really it's not that big a site.
- 119 Umm. I think most private developers will make the cheapest "dog boxes". This area needs common green spaces, facilities and infrastructure. Traffic needs to be managed, bike paths, environmental impact and other strategic planning is needed. This can only be done through a process overseen by government. What about school capacity? bus and train route capacity? waste collection? I don't think "the people" individually can handle that.  
City of Unley, Dept. of Infrastructure & Transport and Dept. for Education
- 120 I would love to see more community focused area aka park, garden, chooks, enclosed dog park with 2 sections one small dogs and one large, a car park for the nurses and all who work at Ashford hospital something open but with cover for coffee shops and cafes to open more for local people to start businesses Just a more community minded plan, rather than a super market, car park, petrol station more fast food outlets or even more houses/apartments we don't need more traffic NOWAY  
City of Unley, City of West Torrens and Ashford Hospital
- 121 Please consider a school and grasslands this is a tiny suburb.  
Dept. for Education
- 122 Multi retail shopping ie Woolworths/Aldi/fast-food restaurants, with ample parking fronting Anzac Highway. Parking is always a major problem here with Hospital Staff and Visitors looking for free parking, leaving nowhere for residents to park.  
No silly Sports Stadiums Please, residential as per the suggested planning.  
City of Unley and City of West Torrens
- 123 I totally support these proposals.
- 124 Thanks for your response. I recommend you include multiple open space/green areas. Possibly one large one between the residential and mixed use plus smaller open green spaces in the residential area and mixed use space.
- 125 Ensure that development is high quality and only moderate density so that quality of the area is maintained.
- 126 I reckon Goodwood station is closer than the showgrounds
- 127 If a supermarket is included, can it be a good quality one that sells a variety of produce and organic food (similar to Pasadena Foodland).
- 128 Ensure existing Leader Street residents are provided permit parking rights during and after construction. Also ensure good quality boutique shops / bars / live music venues are able to operate late to allow area to be vibrant hub that attracts young people  
City of Unley
- 129 A once in a lifetime near-cbd opportunity- let's make it a national model, not a cheap fibreboard suburb. Require eco focussed design- focus on compulsory large scale rain harvesting, internal streets of suitable width to avoid modern development like Mawson Lakes where you cannot drive a car either direction down a street, & include greening that will be the envy of the surrounding

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

suburbs. require efficient smart, central underground infrastructure alignments -invest more now for future payoff

City of Unley

- 130 I think there should be a fenced dog park for small dogs as there is plenty of spaces for big dogs but not small dogs
- 131 Parking is a huge problem and should be provided for existing and new places. The streets can not take any more and it is unfair to the current home owners who pay their council rates
- City of Unley and City of West Torrens
- 132 A supermarket is much needed for this spot. This is one of the most pedestrian friendly locations in the entire Adelaide area, and currently all supermarkets are at least a 20 minute walk away. A local supermarket would make a huge difference to the walkability of the area, and allow more people to live car-free or car-lite.
- 133 It would be great to see the developer do better than the bare minimum 12.5% green space. Please consider the long term greening of this site with big, beautiful trees that will become established over time and provide much needed shade, local habitat and aesthetics to the site.
- 134 Marking parking bays on adjacent streets so that inevitable parking overflow causes minimal issues for residents. Currently driveway access is often impeded and this is only likely to become more frequent.  
Please provide with residential parking permits too.
- City of Unley
- 135 We hope that Forestville retains an element of its old style past but with modern open space and gardens. Its location to city/beach and services makes it ideal. We favour a development that attracts retirees and those small families in a quaint and classy setting in keeping with Forestville and Unley ambience.
- 136 I love this idea.  
Plant 4 has a small IGA that seems to work well. I don't believe we need a large supermarket, plenty of those around.  
There is a lack of walkable establishments in the area as well as green spaces.
- 137 All extra parking that is need should be on the site, there is not enough for local residents now, so it is not reasonable to expect to use the streets at all for parking
- 138 This is the perfect area for residents to access the CBD without needing a car. Upgrade public transport access, cycling lanes and safe, well-lit walking paths into town.
- City of Unley and Dept. of Infrastructure and Transport
- 139 No school needed
- Dept. for Education
- 140 High quality for any residential development please. Consider quality insulation so that this doesn't become another heat trap with everyone needing their air con on from Sept - Apr to cope with large north-west facing windows.
- 141 Yes to acknowledging Kerta Weeta love garden-could include a quiet sensory garden wheelchair and pram small child friendly. a meeting space for quiet enjoyment. Multi-generational providing opportunities for safe community building.
- 142 How do you plan on controlling traffic along Leader Street with so many more people and cars using it? The one lane either way already gets very congested during peak hours but also when traffic

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

backs up due to the train line further down Leader Street blocking off the flow. If we add in a few hundred more cars to the equation every day it is going to be impossible to move. City of Unley

- 143 This would be an excellent place for wetlands fed my rainwater as is happening right now, some trees and grassland surrounds ...
- 144 Please no tall buildings. See several other comments from other residents that there are enough townhouses and apartments in the area. Low density housing that matches the rest of the suburb as well as lots of green space for residents to enjoy. It would be therapeutic for patients and visitors from the hospital plus beneficial for children in the area to have a place to explore and nice retreat for everyone else.
- 145 Would love to see a Plant 4 Bowden kind of mixed area with some outdoor communal space and a mix of hospitality that is family friendly
- 146 This is an opportunity to make a model community. What about implementing ideas such as, Age Care /Kindy fusion, and housing students in an Age Care Facility in return for multi-generational friendship support. I'd like to see disability access inbuilt to all aspects.
- 147 As a Leah St resident we continue to battle this problem, this little street was never suitable for to be a major connector road. An upstream solution needs to be implemented. This intersection will gridlock, it will be dangerous. Children already find getting across this street to get to Goodwood PS dangerous and it stops independent walking or riding to school. We were denied a pedestrian crossing from Wilberforce Way. Locals need to see realistic plans to deal with this.  
City of Unley, Dept. of Infrastructure & Transport and Dept. for Education
- 148 Supermarket & shops would be great as everyone will be able to enjoy and have access.
- 149 Would love to see another indoor shooting/pistol range like Marksman. Incl gel blasters. Otherwise, a shopping complex/mall with cafes, incl health food/low carb options, fruit n veg shop like Central Markets (local growers), health food stores, doctors office/clinic, retail shops. Free open air but covered gym/exercise equipment. Walking track around the site. Underground parking area.
- 150 Would be appropriate to see Universal Design principles reflected in each component of the development- mixed- use and residential.
- 151 I agree it could be a problem, but would prefer well managed parking regulations throughout the neighbouring suburbs rather more parking. I think there's a certain irony that more car parks encourages more cars to the region, the very thing local residents are generally opposed to. Better upgrade public transport corridors, services, real-time stops, bikeways etc.  
City of Unley and Dept. of Infrastructure & Transport
- 152 Yes, this space should be useful and accessible for the students from Treetop school, residents from the retirement units, patients from the hospital and local families living in the area. Open space for people to relax and spend some time outside in nature. Good quality cafes for refreshments and a supermarket such as Foodland for everyday needs. Dept. for Education
- 153 Please no big shopping or apartment complexes. The area is already congested enough. Emphasis should be on shared green space with smaller shops/cafes selling local SA produce.
- 154 Yes, it is so hard to cross in front of the factory on leader street, I often can't cross until a train forces the traffic to stop. This is ANY time in daylight hours. Traffic builds up from both the tram and train crossings.  
City of Unley and Dept. of Infrastructure & Transport

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 155 It is really hard for residents on Everard Ave to have any reasonable parking for visitors - sharing parking on this side of the road would be good. So many people don't use the crossing - people are died trying to dart across to road rather than walk down to the actual main crossing.  
*City of Unley and Dept. of Infrastructure & Transport*
- 156 Yes, I would love to see something similar to the parklands and marshmallow playground.
- 157 I agree a Foodland would be a welcome option (not Woolworths/Coles/Aldi). Foodland offers a range of healthy food options also 'on-the-go' (eg. good for hospital staff and patients) as well as organic and local SA produce. Would be great for a shop to be in walking distance to residents.
- 158 well said!
- 159 There are not a lot of open areas in this part. It would be great to see a lot more family friendly and outdoor areas particularly with so many small apartments being built in the areas. Agreed there area already a lot of choice when it comes to supermarkets and smaller shops are cafes in Goodwood area already closing for this reason. Richmond PS is "full". A feeder school for Adelaide High would great.  
*Dept. for Education*
- 160 Agree. The area has few options for those without a car. A variety of food places and cafes would be a nice addition.
- 161 And a lot of these townhouses are on road corners, reducing visibility for bike riders, and creating more risks with cars backing out of multiple driveways.  
*City of Unley*
- 162 Green space similar to that available at the Forestville reserve is needed; with play equipment for children, exercise machines, space for dogs to run, for picnics and sitting quietly.
- 163 Please! Not another supermarket. The area is well serviced already.
- 164 Parking and traffic congestion are increasingly problematic in Forestville, particularly along Leader Street, Leah Street and in the area bounded by these and Everard Terrace. High density housing will exacerbate the problems.  
*City of Unley*
- 165 Open green spaces similar to the parklands between Parkside and the city with play and exercise areas. Quality landscaping. If any buildings/retail/supermarkets please only quality shops which offer an alternative to what is currently in the area. An Adelaide's finest supermarket Foodland like Pasadena would be a welcome addition. Otherwise small local cafes or the like. Nothing that will increase parking requirements which are already at capacity.  
*City of Unley*
- 166 Parking is the commonality of concern in this suburb and surrounding areas as well as how will this further impact traffic congestion. It would be preferable to increase recreational areas such as parklands with minimal housing development.  
*City of Unley*
- 167 There are only enough car parks in adjacent streets for locals. There is already an overflow from Ashford, KFC and Hungry Jack's. Parking will be key to the residential areas already established staying viable as residential areas. Don't clog the local streets with extra traffic and parking!  
*City of Unley and City of West Torrens*
- 168 Really pleasing to see 15% 'affordable housing' planned here at this important site convenient to the CBD and with TOD attributes. For this to be meaningful, and in the current housing context, let's include an appropriate social housing target.

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 169 I would like to see a good quality supermarket such as a Foodland. The staff from Aspect Treetop Special School may want to take their students to a supermarket to teach them how to shop. Foodland is generally Autism friendly with low lighting, less noise and wider aisles. They also stock a variety of food from SA as well as organic food. Coles and Woolworths are already nearby in Kurralta Park, Cumberland Park and Unley. Dept. for Education
- 170 Please consider using passive solar design principles - a wall or window costs the same no matter which way it faces but it costs a lot more to run poorly designed houses!  
Would love to see a focus on canopy coverage (including some larger shade tree varieties) to adapt to rising temperatures.  
Lots of greenery and shade in the integrated public area please! A water play area for kids nearby cafes/shops would be amazing (like at Plant 4). A co-working space would also be great.
- 171 Excellent opportunity for a statement construction the city of Adelaide/ Unley should be proud of: high standard quality residential apartments; various sizes, lay outs and finishes; up to 4 stories yes but not consistent across the whole complex; variation is the spice of life; lofty ceiling, insulation, sound proofing, solar, underground parking for residents /hospital visitors, Inexpensive supermarket like Aldi, outdoor areas, childcare, studios, sm office space, rooftop gardens, community City of Unley
- 172 Redevelopment of this allotment brings the opportunity to revitalise and change the landscape and surrounding environment.  
Suggest replacing the palm trees in the middle of Anzac highway, which do not reflect the local area, with local natives (gums etc.) to give height, shade, and greenery to residents and the hospital etc.  
The addition of native trees, particularly with height, will pay off in dividends to the character and environment of the region. City of Unley and Dept. of Infrastructure & Transport
- 173 Passive solar design is so important! Proper consideration of eco friendly materials and design to minimise heat is vital. so many new developments are painted dark colours and rely on aircon to keep stable temperatures - terrible for the environment and residents
- 174 It is extremely important to have a successful, high volume business established on the mixed-use section of the site to interact with the current retailers based on Anzac Highway across the road. Do you have any current interest or ideas of large retailers for this area?
- 175 The last thing this area needs is high/medium density housing, it's the ideal opportunity to create a green space in an area that is being proliferated by high rise high density accommodation. Why not for once put amenity over profit
- 176 We really need a good quality supermarket here.
- 177 Would love to see something similar to Plant 4 in Bowden - enough smaller cafes, a pub, a Foodland supermarket, a mixed use space for community events, plenty of green space and shade for community gatherings and local workers and residents to relax and grab a bite to eat that is not HJs or KFC! Parking and traffic management is a legitimate concern, so please consider plenty of underground parking and ways to encourage people to not drive as well. There is opportunity here to create a village! City of Unley
- 178 Would be good to have an under cover + open air food and event space like Plant 4. Lots of communal green spaces. Less generic shops like supermarkets and definitely no petrol stations. Parking in the area will be a major concern (multi story underground?)
- 179 Carbon neutral / 6-star green star rating / climate ready - so avoid surface materials that increase the urban heat island (check out here to see colours of roofs / roads impacting urban heat

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

<http://spatialwebapps.environment.sa.gov.au/urbanheat/?viewer=urbanheat> and here  
[https://www.resilienteast.com/s/Urban-Heat-Factsheets-Combined-FINAL-5\\_4\\_21.pdf](https://www.resilienteast.com/s/Urban-Heat-Factsheets-Combined-FINAL-5_4_21.pdf))

- 180 Peak hour traffic morning and afternoon, including Royal Show and Sunday Markets and other major events - How will the traffic flow be addressed and how will we be able to get out of the side streets off Leader Avenue. It is hard enough now. **City of Unley and Dept. of Infrastructure & Transport**
- 181 There should be small individual homes/units with lots of garden and trees to suit retirees or small families. Don't like the big multi story/complex units like opposite the Show Grounds on Leader Street. That is too much concrete cement and bricks.
- 182 As an older driver who struggles currently with turning from side streets into Leader Street (especially during peak hour), what additional traffic devices are going to be put in place to assist with traffic flow. **City of Unley**
- 183 Why don't you build a new high school here? **Dept. for Education**
- 184 I would like to see open space facilities, lots of greenery and BBQ areas, what about community type centre for elderly/youth/disadvantaged? Carparking area needs to have shaded overhead solar panels. There should be lots of vegetation to keep the area (ground) cool. No more shopping, no more retail/supermarkets, there are enough around.
- 185 This mixed area should be about community engagement activities, rather than commercial shopping facilities. Do we need another cafe? Playgrounds, some sporting grounds (if enough space), somewhere to contemplate life!
- 186 Please make driveway access to this mix use area via Anzac Highway and not leader street. Leader Street is already subject to high traffic volumes which makes exiting for local residents difficult in peak times. **City of Unley and Dept. of Infrastructure & Transport**
- 187 We ask this to be small homes with back yards rather than high rise buildings. The area needs to have plenty of vegetation to keep the area cool and help the environment not massed blocks of units.
- 188 The follow through of traffic on to Leah street is extreme already! With all the other wider streets not willing to share the load, the entry point for cars really needs to be Maple NOT Leader! We need to share the load around. I am all for a new project, Le Cornu was a busy eye sore! Just make it work for the community at large. Next look at buttercup, that looks horrible for a 'Village' environment in the city of Unley, all buildings need to look appealing and follow the look of the area!! **City of Unley**
- 189 Given that this is a major development, presumably with a longer vision to the future, is there any plan to expand the footprint? i.e. if the warehouses on the opposite side of Maple Avenue were compensated in the future could this development eventually adjoin the barracks?  
If so, (acknowledging that the barracks is Federal land), could some of the barracks be acquired and converted to a high school? **Commonwealth Dept. of Defence and Dept. for Education**
- 190 I agree with Renewal SA's broad proposal for the mixed-use section of the development to be built along the Anzac Highway frontage. It would be very useful to have a small supermarket/convenience store included here; there are NO fresh food shops in Everard Park - just a cafe & a few takeaways. But I hope the area covered by this mixed-use section will be MUCH smaller than both the residential & open space areas; the need for the latter two areas is much greater.

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 191 Open space is a vital part of this development. It should incorporate lots of trees, garden & seating areas, grassed areas for ball games & picnics, as well as play areas for children and young people. A mini-version of Heywood Park where the whole area is intended for public recreation (not the use of organised sporting clubs) would be a most welcome addition to this part of Unley.
- 192 We need a Foodland or Woolworth in this area. Residents in this area can only go to Kurralt Park shopping center, which is TOO crowded. Building a shopping center is really the best choice in this location, and that is why Kaufland(German supermarket) chose this location before.
- 193 Open space development, green space, oval, playground etc. Do NOT want a 'Bowden' type development.
- 194 As a parent of small children I LOVE it if there are cafes near playgrounds. the two are not mutually exclusive!
- 195 To Whom It May Concern,  
I support the proposal for the former Le Cornu's site at Forestville, the mixed use and affordable housing proposals are sound and it is a good idea to also have some green space for community use.
- 196 What an amazing opportunity to create a green space for the community, a park with native vegetation, shaded areas, a cafe in the center where people can come together, relax and exercise. It would also provide a view for surrounding apartments and raise the quality and value of the area.
- 197 For the residential area, the development by Nightingale Housing (NH) in Brunswick (Melbourne) seems an ideal model. NH offers architect-designed collective housing that prioritises sustainability, affordability & liveability. Car spaces aren't required due to proximity to public transport, cycle & walking tracks. Apartment blocks vary in design; all are low-carbon, with roof top gardens, shared laundries & communal bike storage. See [nightingalehousing.org](http://nightingalehousing.org) for more information.
- 198 This 3.6 ha ( not HA as your sign says, stop showing your ignorance the metric system is case sensitive!!!) is a golden opportunity. A mixed type site would be a golden opportunity lost.  
1/ Why not put the new Women's and Children's hospital here? It's not far from the RAH if they need and urgent transfer and it is right opposite the Ashford Emergency department. This site is much more easily accessed for ambulance and customers.  
2/ The Crows could build their oval and facilities there SA Health and Ashford Hospital
- 199 Please use native plants to encourage native species of birds and butterflies to have habitats
- 200 What traffic control device are you going to put in place at Leader Street and Leah Street junction. Often long queues extend/exist west on Leader St for those wanting to turn right to go south on Leah St (during peak hour). There should be a slip lane for traffic going east on Leader Street. Current carparking prevents overtaking on the left. City of Unley and Dept. of Infrastructure & Transport
- 201 This could be a potential school location with Richmond Primary school and Aboriginal school needing to move due to south road upgrade Dept. for Education and Dept. of Infrastructure & Transport
- 202 Additional housing will create additional stress on the public transport system. Pre-COVID buses were sometimes so full by the time they got to the Ashford stop that they could not collect anyone. How will this be considered? In addition, the bike lane on Anzac Hwy is not particularly safe as it is not separated and not wide enough. As more traffic is added to this area both with housing and mixed use development, how will the safety of bike riders on all local nearby streets be considered? City of Unley, City of West Torrens and Dept. of Infrastructure & Transport

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 203 Please use native plants in all areas of the development to ensure sustainability for native species and birds
- 204 Or Maple Ave please City of Unley  
(**parent comment:** Please make driveway access to this mix use area via Anzac Highway and not leader street. Leader Street is already subject to high traffic volumes which makes exiting for local residents difficult in peak times)
- 205 What an opportunity for a beautiful precinct to be constructed. Sadly the greedy developers will want to put up another batch of tiny sterile matchboxes as has happened all along Anzac Hwy. Review the older blocks of flats that are now becoming ghetto-like. Is that is what is wanted here for 10-20 years time? All parking should be below ground. Above ground about half should be parks and green space. The affordable housing concept is a nonsense for this area.
- 206 I am a long term resident on Leader St and am concerned about the continuous stream of cars doing U Turns at the Anzac HW end. (After the median strip): to access Third Ave or Hungry Jack's etc (east bound, U Turn, westbound), which is a hazard already, let alone with the advent of this new development.  
Concerned also about the entry/ exit points affecting existing heavy traffic flow; could Maple Ave be the only exit point for example? Leader entry/ Maple exit?  
City of Unley and Dept. of Infrastructure & Transport
- 207 While a good facility such as a supermarket (Woolies/Aldi) is a great idea, as soon as a carpark is added it would be swamped with visitors and patients for the Ashford Hospital or the specialist services. The alternative - paid parking - would diminish the value of the supermarket or general shopping idea (why Kaufland dropped their plan?). That reduces it to something like a service station or fast food zone (Please NOT Maccas!!!! there is already a Hungries next door). Greenzone the back part.  
City of Unley, City of West Torrens and Ashford Hospital
- 208 I think the biggest concern in high density is the sever lack of parking, if you are planning to do high density there must be enough parking for a min of 2 cars per home + substantial visitor parking too. On top of this, the hospital visitors park her and well as park and ride nearby. Keep in mind residents in the surrounding streets do not want everyone from this site parking in front of their homes either. How are you planning to manage the parking requirements?  
City of Unley and City of West Torrens
- 209 SA is a state with an aging population. How about designing a wonderful environment for multi-stage aging. Stage 1 for independent living retirement village style accommodation; Stage 2 for semi-independent living where residents need some assistance with their daily living; Stage 3 for full-care aged care. Elderly people usually have appointments at Ashford or in the city, so this location would be ideal.  
Ashford Hospital
- 210 More commercial area is required with housing up to the railway line, Access could be made to the railway for commuters and buses could deviate into the commercial area. It would be an ideal site for a large shopping complex with major retailers such as Woolworths as well as smaller franchises. There are numerous high density building in the area, Ashbrook Apartments already has approx 140 residents and it is on a major thoroughfare to and from; the city. Easy and disability access is a must,  
Dept. of Infrastructure & Transport
- 211 The boundary area between the mixed use and residential zones could be divided up into a number of 5m x 3m garden plots as rentable spaces for the keen gardeners to plant their own vegies/flowers while living in the medium/high density housing. Each plot would need to be appropriately fenced and the rental renewed each year. Imagine two 5m wide rows with a 2-3m wide service lane

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

between and then each of the 3m plots accessible from that lane. Water provided and part of the annual lease.

- 212 Yes, a green park always makes a city more attractive.
- 213 I live in Ashbrook Apartments next to Ashford Hospital along with approx 140 other people aged 55 > 90+. As the larger shopping centres such as Marion, Westlakes, Burnside are quite a distance away it would be profitable to have a Woolworths, small shops, coffee shops, GP centre, outdoor areas all which would be easy access/disability friendly. The growth in the area, staff/visitors at Ashford hospital, Ashbrook residents would warrant it, along with it being on a major route to the city. Ashford Hospital
- 214 I agree that a shopping centre close to Ashford apartments and the hospital (and this area in general) is a good move. A Foodland would suit because it user friendly in terms of width of aisles, reachability, incorporation of cafes and community activities (referring to Pasadena style Foodland here).
- 215 I think a Foodland would be a great fit. If carefully thought through I think parking could be managed. For example, in Norwood where you have time limited (2 hour) free parking, allows for a relaxed visit while keeping things turning over.
- 216 I agree that there is a need for a green garden space for the community to use. A good quality supermarket that sells fresh food such as a Foodland with a good quality cafe would be convenient as well.
- 217 I think it would be more visually appealing and enjoyable to have a garden/green open space for everyone to use. The houses should have their own gardens included.
- 218 Agree with the need for breathing room. Community space to enjoy nature and rest and recharge - a rare opportunity to make this happen and really add value to the area. If residential is a must, please avoid boxy mini apartments (like at Bowden) which don't age well. This corner of Adelaide is crying out for a beautiful green space like Marshmallow Park in the south park lands.
- 219 To build a school with all the necessary facilities (gym, specialist classrooms, outdoor areas for breaks, staff car parks etc) would take up most of the land. School pick up and drop off also creates a lot of traffic - it's a major problem at the school I work at. Could the Keswick Barracks lands be considered for a school? This land, I think, is best suited to community green space. A good quality supermarket and cafe would also be helpful. City of Unley, Commonwealth Dept. of Defence and Dept. for Education
- 220 To suitably accommodate medium-high density housing we need to services to accommodate the increase in people. Some GPs aren't taking new patients. We need safe foot/bike transport from Anzac Hwy to Goodwood Rd, we need green space for families to gather, we need supermarkets with longer opening hours. City of Unley and Dept. of Infrastructure & Transport
- 221 We already know this will be a mix of high and medium density housing. I think that is great if designed well. However I do think 10 to 12 stories is too high. I would like to see maximum 6 stories at the high density end and for the majority to be 2 to 3 story medium density housing. Human scale, walkability and green areas are a must. I would also love to see small local bars and cafes here.
- 222 I'm happy to see a Foodland/Aldi/Woolworths/Coles in this location. I have lived here for many years and all my neighbours are looking forward a supermarket here. The nearest supermarket is Coles in Kurralta Park, which is really too crowded, especially on weekend.

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

- 223 Heat pump technology, evaporative aircon and solar panels should be standard on all new dwellings. In combination with good design this will ensure heating and cooling are very low cost and environmentally friendly.
- 224 Wide streets does not automatically mean more cars, it could mean more light, open spaces for trees, shrubs, bike path, footpaths, etc. This is a good idea and looks like most ideas involving open natural corridors and spaces are getting the most upvotes. Good work everyone!
- 225 Love the idea of canopy coverage!
- 226 I agree. The name Forestville evokes the image of greenery. Let Forestville be known for its beautiful gardens and trees.
- 227 Please no large shopping complexes. A good quality supermarket, original cafe with a relaxing atmosphere and maybe a small post office/news agent is all that is needed in this area. The majority of the land should be used for a relaxing green space. Please include trees and bushes throughout. Forestville has the word 'forest' in its name. Let the area be known as a forest.
- 228 Green space needs to be green space - Native trees, shrubs, bushes essential to off-set the amount of traffic fumes & noise along Anzac Highway. Include facilities to enjoy the space - BBQ areas, playground, a basketball hoop with Underground parking provided. These Open spaces are a gift and need to be nurtured - mental health benefits, community connections and family friendly.
- 229 I'd like to see a development that truly gives adequate green space and breathing room between roads and streets. The apartment buildings should have backyards or decent size balconies, and gardens and space around the buildings. So many high rise developments I see up Anzac Highway sit meters from the road with no thought for actual enjoyable living, not accounting for noise and air pollution, or reflecting the lifestyle we love in Adelaide, only maximizing the square meterage.
- 230 As per a few other comments -Medium to low density housing using sustainable materials, renewable energy, smart water use/reuse and range of designs suited to Australian environment \*not jammed together\*, underground parking, native vegetation, with provision for large trees and green space.
- 231 Please no large retail shopping center or fast food places - KFC and Hungary Jacks are already plenty. A supermarket that sells a variety of good quality food would be welcome such as Foodland. Original cafe/restaurant would be preferred. The majority of the space should be used for a green space to cater for the many residents living in apartments and as a place for hospital staff to relax during their breaks.
- 232 Please no large shopping complexes. A good quality supermarket, original cafe with a relaxing atmosphere and maybe a small post office/news agent is all that is needed in this area. The majority of the land should be used for a relaxing green space. Please include trees and bushes throughout. Forestville has the word 'forest' in its name. Let the area be known as a forest.
- 233 Pasadena Foodland has a great atmosphere similar to Plant 4. It has a cafe inside the supermarket plus a florist just outside. There's the opportunity for live musicians to play inside. This could work here - a small to medium Foodland with one or two quality cafes with a florist included. Maybe a small newsagent/post office? Parking could be underground with a ticket system similar to the Foodland in Norwood. First 2 hours free and then a small fee for each additional hour.
- 234 Hello, just wondering what exactly does 'affordable housing' mean? As it is mentioned separately from the other housing descriptions.

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

Also, I am in agreement with others on here that a Plant 4 Bowden type set up (of our own) would be useful and add to the existing character of the area

- 235 Heywood Park is beautiful. Something similar here would really suit the area and be well used by the local residents.
- 236 Re the Le Cornu site- I am in favour residential development with social housing and open space included as per the concept plan
- 237 My family would like to see one of Adelaide's Finest Supermarkets (Foodland) built on the Forestville Development site.
- 238 I agree that a space for the community to gather is a great plan for this site development, but Plant 4/Bowden style to me doesn't suit the surrounding areas of Forestville/Goodwood/Black Forest/Wayville etc. Something more green with a less factory like appearance would be nice with flexible shade/shelter structures as someone has mentioned.
- 239 There should be dedicated fenced off dog areas as it is inevitable that people will have dogs and thus it is better for there to be dedicated dog parks than for dogs to be in the other public areas.
- 240 So many – the majority – of comments pertaining to the Forestville development are calling for much less residential development than what is being proposed. Certainly, no high density and absolutely no high rise dwellings. Many comments are also against medium density dwellings. Some comments are even opposed to any residential development on this site at all.
- 241 Has any thought been given to a secondary school? This would be an ideal location just west of the city to alleviate enrolment pressure on the 2 city high schools. Suburbs that have recently been locked out of Adelaide botanic and Adelaide high could be offered a more acceptable option on this site.  
**Dept. for Education**
- 242 There should be much more than only 12.5% dedicated for green space. So many of the comments on the Forestville development are calling for much greater shared, community, green spaces. These spaces need to be suitable for diverse populations and purposes. There needs to be outdoor BBQ/dining and playground areas for public use. Huge diversity in plant species is needed. Appropriate trees need to be included to reduce the 'heat island effect'.
- 243 I'm in favour of more green space and concerned re increasing traffic from retail and residential, as Leah St and Leader already struggling. Fenced dog park would be great as Unley Council doesn't have one.  
**City of Unley and Dept. of Infrastructure & Transport**
- 244 There should be NO vehicle access to or from Leader Street. This is a recurring theme of this consultation process.
- 245 Government departments and offices are notorious for running public consultations which are entirely tokenistic, and the findings/evidence/input from constituents are ignored. Exactly how will the community's input on the Forestville development be used to inform decision-making? And if the community's input is different in view to what Renewal SA and the chosen developer/s want for this site, how will these be reconciled and whose opinions/views will be privileged?
- 246 It would be great to see this space used to promote commercial and residential initiatives that support a culture of reuse, recycling and carbon emission reduction. In 2018, a post about this Swedish Mall circulated ([https://www.huffpost.com/entry/recycled-mall-sweden-retuna\\_n\\_5bfd0762e4b0eb6d931346b3](https://www.huffpost.com/entry/recycled-mall-sweden-retuna_n_5bfd0762e4b0eb6d931346b3)) and it generated such excitement. This site could be a

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

centre where people could go to for mending broken items, donating and buying second hand and seeing things recycled and repurposed.

- 247 Forestville is zoned for three state schools – namely, Goodwood Primary School, Adelaide High School and Adelaide Botanic High School. All three of these schools are under capacity management plans. The State government now wants to increase the population of Forestville. This will create further pressure on the enrolments to these three schools. It is NOT acceptable for Forestville to be rezoned to other schools. Forestville MUST remain in the zoning for all three of these state schools. Dept. for Education
- 248 Please consider increasing green space allocation. This area needs a decent sized park. Not a token lawn with a few park benches, but wide open natural landscaping with multiple areas for families and community to gather and spend time with room to breathe.
- 249 Traffic is definitely not a concern as since the development near Hungry Jacks the traffic in the side streets has increased dramatically and parking around the Nibley Ave park is horrendous. Some days we are unable to reverse from our driveway. City of Unley
- 250 This is a unique opportunity to make a significant mark within an already very lovely neighbourhood. It will be greatly enhanced if the plans create a seamless little village type feel not overwhelmed with “cheek by jowl” housing and tiny green spaces. Having recreation areas and good shopping amenities will attract from surrounding areas. Underground parking at a superlative grocery shopping complex would be great to accommodate this.
- 251 Given the loss of tree canopy in the city of Unley green space, multiple microparks across the site for tree canopy to help reduce heat island effect and improve liveability. City of Unley
- 252 Has the Ashford Special school been consulted? They would have needs to take their students to a supermarket that has quiet days without music etc like Pasadena Foodland. Students can be taught how to shop and use money etc as part of their learning. Dept. for Education
- 253 100% agree that a Bowden style development would not suit this space. Bowden is factory-like and the apartments are not attractive to look at. If housing is to be included it should be low density and well designed to blend seamlessly with a communal green space in combination with BBQ, playground and exercise areas/walking/bike paths. These should make use of natural elements and pay homage to the area's name "Forest"ville.
- 254 30% minimum green space please. Places where everyone from the surrounding streets can go to do exercise, meet friends and relax. Unley Council wants to achieve 31% tree canopy by 2045, which will mean this site will need to have a lot of large tree plantings now or even more smaller tree plantings. It could look fantastic and create a cool and beautiful environment. City of Unley
- 255 A new city high school places here would be really smart and cater to the existing demand for inner city schools. Enrolments are soon going to be overcapacity at both the state city high schools. The State plan for development has been to increase housing closer to the city but with it we need corresponding investment in social infrastructure. This site lends itself to a school as it is on a bus, tram and train route. Dept. for Education
- 256 Traffic is definitely NOT a concern to council or developers. Since the development near Hungry Jacks the traffic in the side streets has increased dramatically and parking around the Nibley Ave park is horrendous. Some days we are unable to reverse from our driveways. There is more high density housing replacing sgl homes along Anzac Hwy and infrastructure is not keeping up now.

# FORESTVILLE STAGE 1 COMMUNITY ENGAGEMENT REPORT APPENDICES

Schools in the zone are at capacity where do these additional kids go.  
Single housing and green space please!!

City of Unley and City of West Torrens

- 257 Will a bike path be included on Leader St. to join existing path along railway line? Our daughters would us this to get to work in the city. City of Unley and Dept. of Infrastructure & Transport
- 258 Are there any plans to change Good-wood train crossing on Leader street? There are significant delays using that route during peak hour already. The volume of traffic would increase significantly with the new housing development. Dept. of Infrastructure & Transport

# RenewalSA
